

# MOSQUITOES CAN SPREAD ILLNESS

## Protect Yourself with Repellent

Always read label directions carefully for the approved usage before you apply a repellent.

Apply insect repellent to exposed skin or clothing, but not under clothing.

Treat clothing and gear with products containing 0.5% permethrin. Do not apply permethrin directly to skin.

Some repellents are not suitable for children. Ensure repellent is safe for children and age appropriate.

### Around Buildings

At least once a week, empty or cover anything that could hold water, such as:

- Buckets
- Toys
- Child Pools and Pool Covers
- Birdbaths
- Trash, Containers, and Recycling Bins
- Boat or Car Covers
- Roof Gutters
- Coolers
- Pet Dishes
- Tires

## Stop Mosquitoes from Breeding

Mosquitoes can live indoors and will bite at any time, day or night.

Mosquitoes breed by laying eggs in and near standing water.

As little as one teaspoon or bottle cap of water standing for more than one week is enough for mosquitoes to breed and multiply.

## Keep them Outside

Use Air Conditioning

Keep Screens on All Windows

### Repair Holes in Screens

Keep Doors Exterior Windows Closed
